

PANINTEL

PROJECTS NIGERIA LIMITED

Engineering | Procurement | Construction | Project Management

COMPANY PROFILE

www.panintelng.com

We align ourselves with international best practices and are **committed to delivering nothing less than Excellent Service.**

About Us

Who We Are

Panintel Projects is a limited liability company, incorporated under the laws of the Federal Republic of Nigeria.

We are wholly indigenous, with local and international affiliations and partnerships, specializing in Engineering, Procurement, Construction and Project Management services.

Our Core Solutions include:

- Project Engineering and Management
- Oil, Gas, Power and Energy Asset Development
- Engineering, Procurement, Construction and Management
- Technical Safety Studies and Risk Management
- Project Financing

Vision, Mission & Core Values

Vision

- To become the point of reference in the Oil and Gas industry, known for superior service delivery with utmost professionalism, all around the World

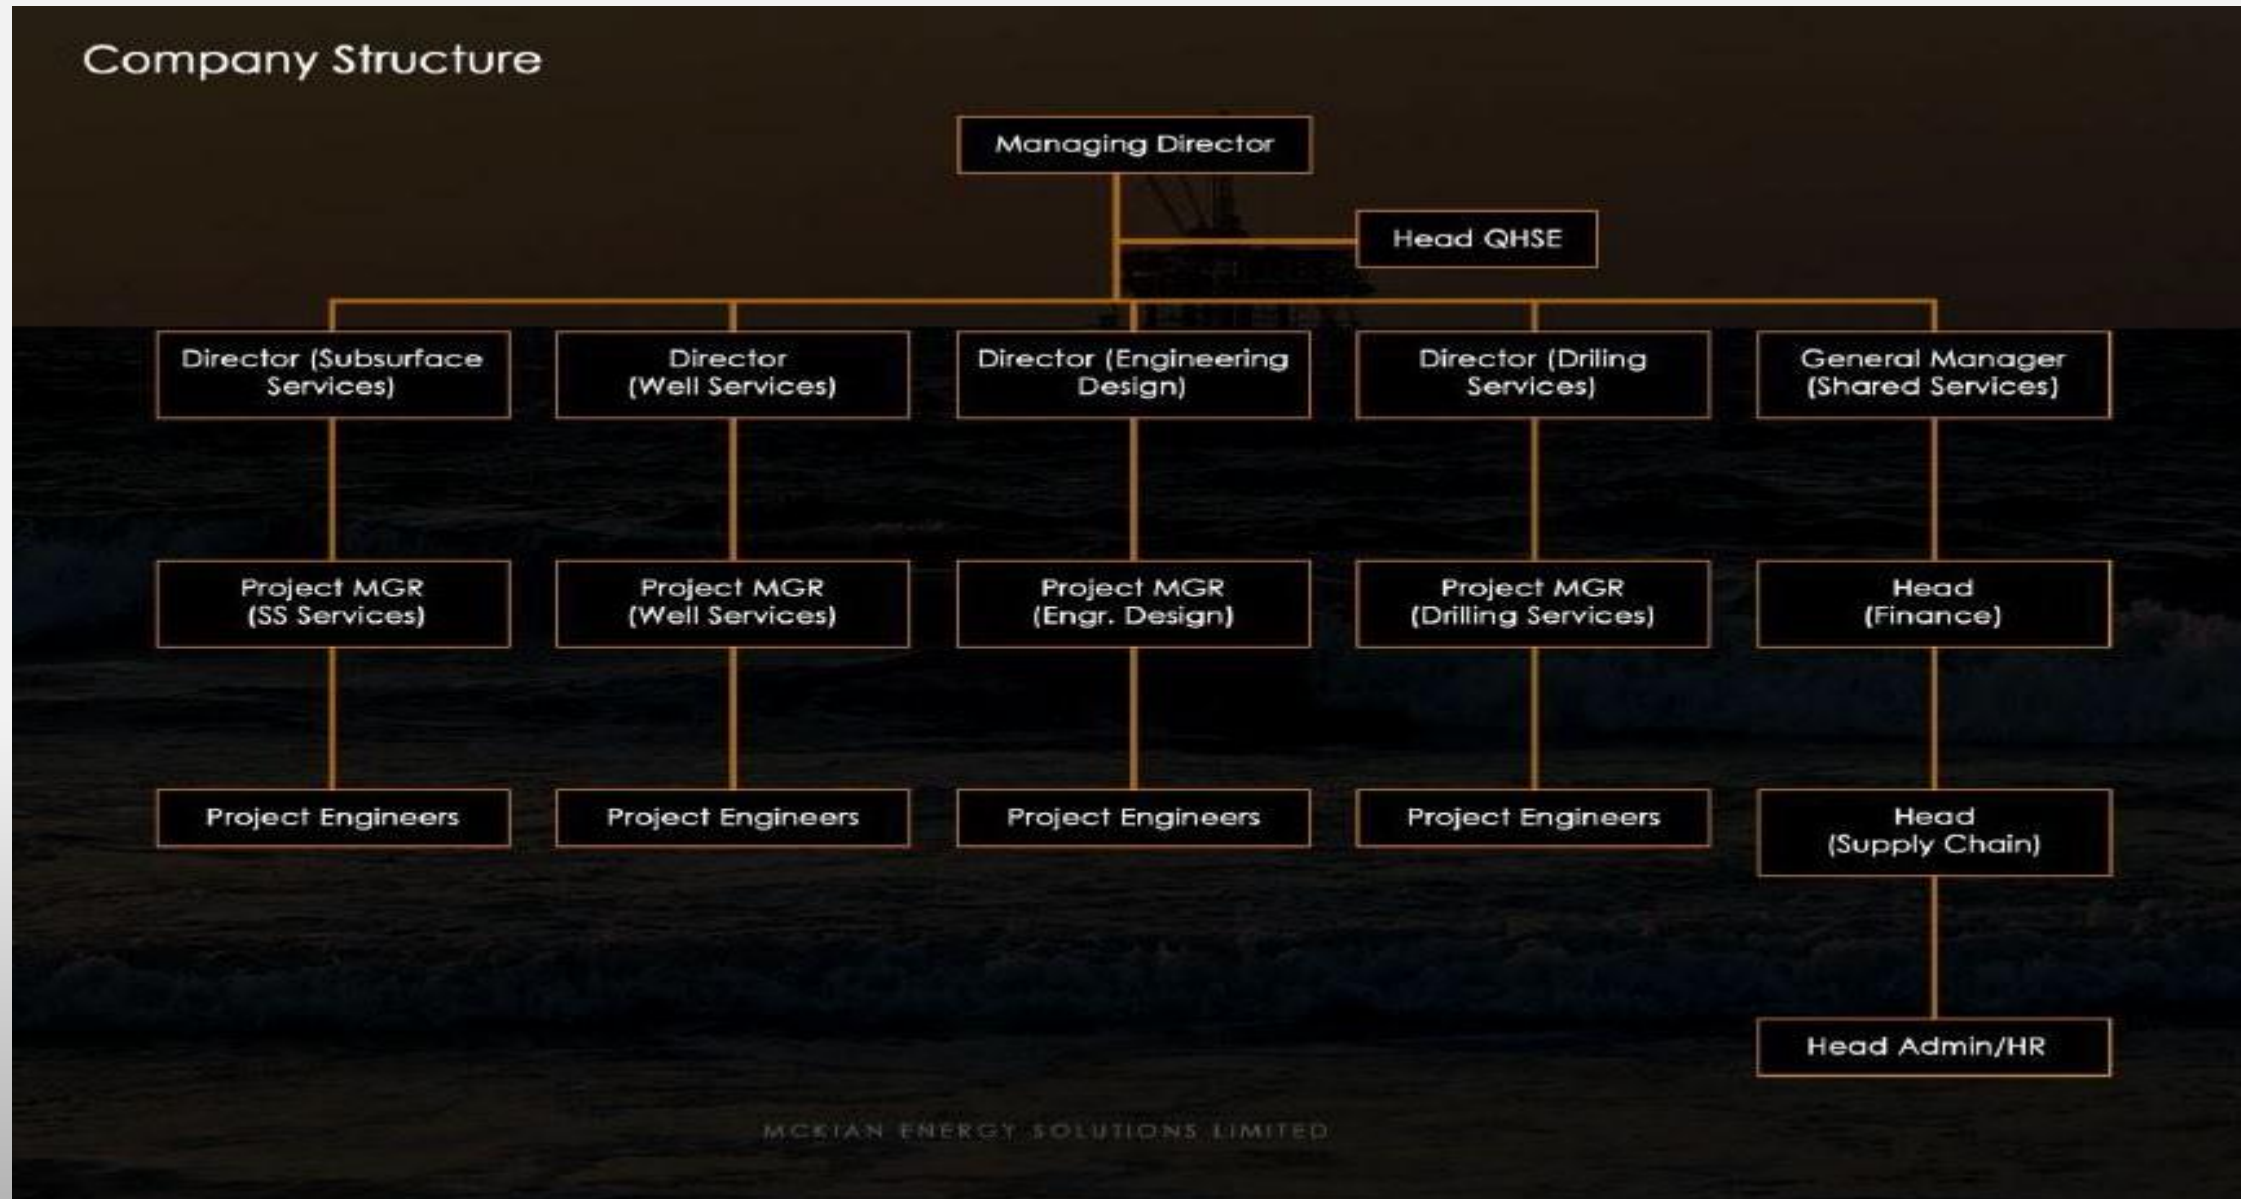

Mission

- To provide the best value in services for the Oil and Gas Industry all over the World.

Core Values

- **Integrity**
- **Excellence**
- **Team Work**
- **Corporate Social Responsibility**

Organizational Chart

Services

FLOATING PRODUCTION STORAGE AND OFFLOADING SYSTEM (FPSO)- MID SIZED. 15,000 – 30,000 BPD, 100,000- 250,000 BBLs STORAGE CAPACITY.

FLOATING, STORAGE AND OFFLOADING SYSTEM (FSO)- MID SIZED. 80,000- 350,000 BBLs STORAGE CAPACITY.

INTEGRATED EXTENDED WELL TEST UNITS
Test Separator, Choke Manifold, Line Heater, Production Separator, Gas Scrubber, Flare, Flow meters, Tank, INTEGRAL 50,000-90,000 BBLs STORAGE FOR OFFSHORE/SWAMP/SHALLOW WATER OPERATIONS.

MOBILE OFFSHORE PRODUCTION UNIT
20,000 – 30,000 BPD PROCESSING CAPACITY
INTEGRATED 10-12 SLOT WELLHEAD FACILITIES
10 MMSCFD GAS COMPRESSION FACILITIES
GAS FIRED POWER GENERATORS
250FT WATER OPERATIONS
4 CRANES, PRODUCED WATER SYSTEMS

INLAND/SHALLOW WATER SPUD BARGE
140 FT x 40FT, CRANE, ACCOMMODATION
MAINTENANCE CABIN, STORAGE CABIN, GAS FIRED GENERATORS, 40FT SPUDS, UTILITIES

Services

Oil, Gas, Power and Energy Asset Development

We provide Technical Operations Support services across various facilities, ranging from Oil and Gas Production Facilities and Power Plants to list a few. They include:

- Oil & Gas Production, Operations and Maintenance Services
- Early Production Facilities
- Crude Oil Dewatering and Produced Water Treatment Facilities
- Crude Oil Haulage and Produced Water Disposal Services
- Well Testing Operations
- Pipelines, & Flow lines Maintenance Services
- Oil and Gas Production Facilities
- Power plants
- CNG and LNG Facilities
- Drilling Services
- Well Services and Completions

Services

Engineering, Procurement and Construction Management

Panintel Projects offers an array of Project Engineering, Procurement and Construction Management solutions. Our specializations include:

- Concept Screening, Selection and Definition
- Front-end Engineering Design
- Detailed Engineering Design
- Facility/Plant Valuations
- Independent Design and Drawing Reviews/Assessment/Audits
- Risk Assessment/Analysis

Services

Technical Safety Studies and Risk Management

We provide a comprehensive range of Technical Safety Services that support safe performance of a facility over its entire lifecycle. We also follow a structured hazard and risk management process to demonstrate and document how hazards are identified, evaluated and controlled.

Our objective is to prevent disasters through a proactive response. Our core technical and risk management services include:

- HAZOP Studies
- HAZID Studies
- FIREPRAN Studies
- SAFOP Chairman/Leadership
- What-if/Checklist Analysis
- Vent Dispersion Analysis
- FMEA
- Fire and Explosion Studies
- Fire Investigation
- Qualitative Risk Assessment
- Event Tree Analysis – ETA
- Fault Tree Analysis – FTA
- EER/EESA Analysis
- RAMS
- Failure/Incident Investigation and root cause Analysis
- Hardware Barrier Assessment
- Risk Based Inspection Technical Audits and Facility/Equipment Inspection

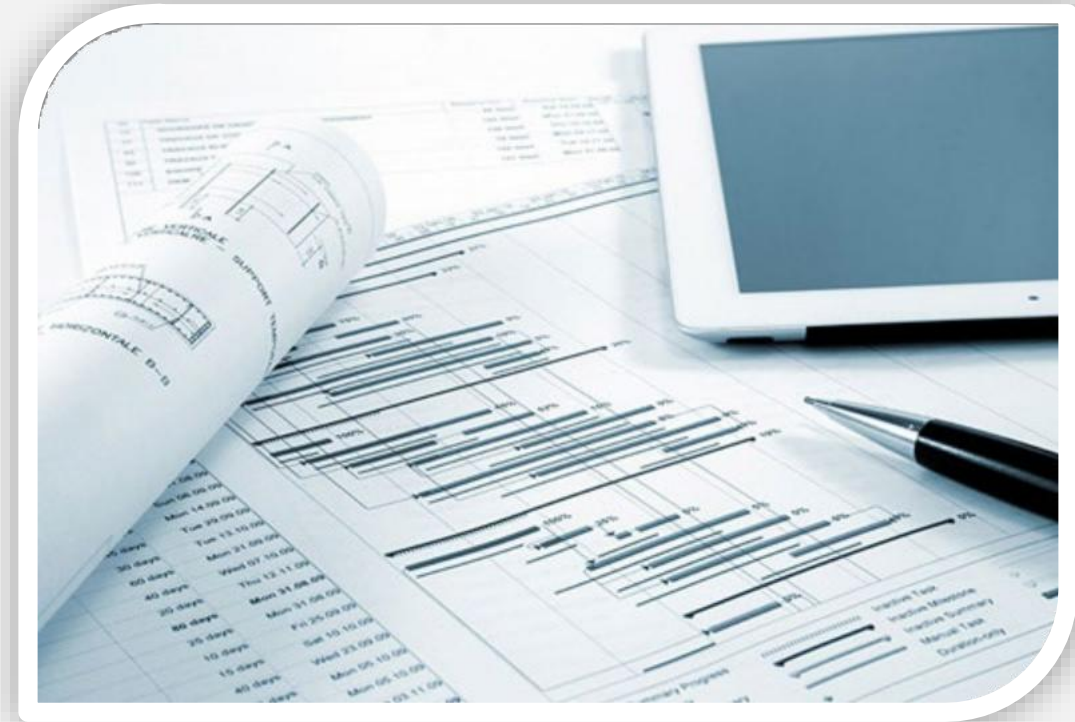

Services

Project Engineering and Management

Our Project Engineering and Management solutions encompass the following areas:

- Technical and Economic Feasibility Studies
- Project Planning and Supervision
- Project Audit
- Quality Assurance and Control
- Financial Modelling
- Project Financing

Services

Well Integrity Management Solutions

Industry research indicates that a large number of wells are affected by integrity problems. The severity and frequency of well integrity problems strongly depends on the region, the fluids handled and age in the wells. Globally, it is estimated that 38% of oil and gas wells are operated in harsher environments. This may not necessarily affect the integrity of the well, but the operator has to monitor the well's condition very closely and act quickly if a further fault is detected.

We assist our clients to safety and sustainably find, drill, complete and produce oil and gas fields efficiently and cost effectively.

Services

Field Development and Optimization

Panintel Projects provides an integrated and wholistic approach to field development planning and optimisation.

Our consultants have extensive experience working in different geographical locations with independent operators and engineering companies / consultancies and understand the importance of the right concept definition on project economics, time to market and return on investment.

We partner with our clients going through a rigorous concept ranking stage to arrive at the most suitable concept for the development.

Services

Other Services

- Surface Well Test / Early Production Facility
- Crude Dewatering Facilities
- Produced Water Treatment Facilities
- Crude Haulage and Produced Water Disposal Services
- Sand Management
- Haulage Services
- Equipment Leasing
- Procurement Management
- Reservoir Data Acquisition

Health, Safety and Environment

Health, Safety and Environment

Safety and operations integrity are the foundations of Panintel Projects' business. Nothing is more important. We hold our commitment to excellence in safety, security, and health in the workplace as a core value—one that shapes decision making at every level.

This commitment is documented in our safety, health, and product safety policies and security expectations, which are implemented through our FRAMEWORK. Both contractors and employees are required to follow these expectations as a condition of engagement.

We have deployed enhancements to our policies including expectations related to leadership, process safety, and assessment of our effectiveness.
